und Consultant in Einem.

SimCorp Dimension IT Application Expert

IT Consultant – IT Specialist System Integration – Application Coordinator

ABOUT US

As a management consultancy in the IT environment we have many years of experience with SimCorp Dimension (SCD) in the area banking, investment companies, insurance and securities trading. We assist our clients in establishing and operating the standard software SimCorp Dimension.

Thanks to our specialization and our status as a SimCorp Dimension Implementation Partner our customers are well-known fund companies, banks and insurance companies. Since our founding in 2004 our team has grown steadily, as has our total revenue. Our plan for the coming years is ambitious.

JOB DESCRIPTION

We are looking for an IT Application Expert to strengthen our team in Munich.

As a Senior Consultant / Technical Expert for SimCorp Dimension (SCD) you have already gained extensive experience in SCD during project interventions.

Additionally, you have experience in the administration of a standard software and in cooperation with offshore service providers. We offer you a long-term and multifaceted job in operations and project tasks within SCD. You contribute overall expertise in finance and in technical aspects of SCD. You will represent an interface function between the fields of securities trading, funds administration, and the fund and data center.

After on- and off-the-job training, you will assume the responsibility for and support of SCD operation. You will ensure a continuous operation of the software, e.g. by creating manuals and documentations (in German and English) and by developing Service Level Agreements.

As a competent partner, you will be responsible for project system managers, SCD users and coordinators in the data center. You will represent the connection between our clients, the external service providers and our employees. As an expert you will be responsible for the application and support of SimCorp Dimension.

Software operation for three international locations is carried out in English. This requires occasional project work up to midnight, operations outside normal working hours or on-call duties.

YOUR ACTIVITIES

- working with the software SCD
- supporting an interdisciplinary and an international team to ensure effective and proper application
- analyzing errors and optimizing the customizing settings
- responsibility for service levels and initiate projects to improve the SCD configuration
- responsibility for the secure operation of applications
- supporting 5 local colleagues and 5 offshore employees, in the 24 shift operation
- creating customized documentation of operational and supporting processes
- preparing and arranging installations and upgrades
